

Simulating and Mitigating the Atmospheric Effects for CMB ground-based Observations

Friday, 13 August 2021 11:25 (15 minutes)

In this talk, I will present the simulation status of the atmospheric effects for the LSPE/Strip telescope. In particular, I will emphasize how this technique can be easily applied at the other CMB ground-based experiments like QUBIC that will observe the CMB from the Atacama sky

Presenter: MANDELLI, Stefano

Session Classification: Junior Scientist Talks
