

## 2021 Summer Collaboration Meeting

Contribution ID: 122

Type: **not specified**

# Discussion

*Tuesday, 10 August 2021 13:30 (30 minutes)*

For stellar-flare science, what do we need in terms of:

- Alert stream contents & timescale
- Additional technical infrastructure / data products

Do we benefit from a higher-cadence experiment from the Pole? (Higher depth, higher cadence, longer revisit time)

**Presenters:** HO, Anna (UC;LBL); VIEIRA, Joaquin (University of Illinois at Urbana-Champaign;)

**Session Classification:** The Time-Varying mm-Wave Sky
