

Values & Vision Statement

Sara Simon (*she/her*) + Jeff McMahon (*he/him*)

Values and Vision Statement

- Reflects the core principles and ethics of our collaboration
- What we want to achieve and become in the future
- Guide collaboration policy and activities
- Motivate and prioritize recommendations and changes to policy

Scope

- Our values statement will include both social and scientific values
 - Developed social values at meeting last year, presented and refined in August → In this part of the session, we'll present the “final” draft which is open for feedback/comments
 - Working on scientific values later in this session
- Values are big umbrella ideas that many things fall under
- Values don't have to be things that we feel like we are achieving now→ they can be areas that we put action behind to achieve
- We want to have accountability to these values by
 - Providing resources and support to uphold these values
 - Implementing recommendations stemming from these values
 - Tracking how well we are upholding these values

Values & Vision Statement

- [Final draft of values & vision statement](#)
- Ways to give feedback:
 - Comment feature in the Google Doc
 - EDI committee:
 - #edic on slack
 - edic@cmb-s4.org
 - Meetings are open to all in the collaboration: 3 pm CT every other Thursday, next meeting on 4/20/23
 - Spokespeople
